

Empathy map canvas

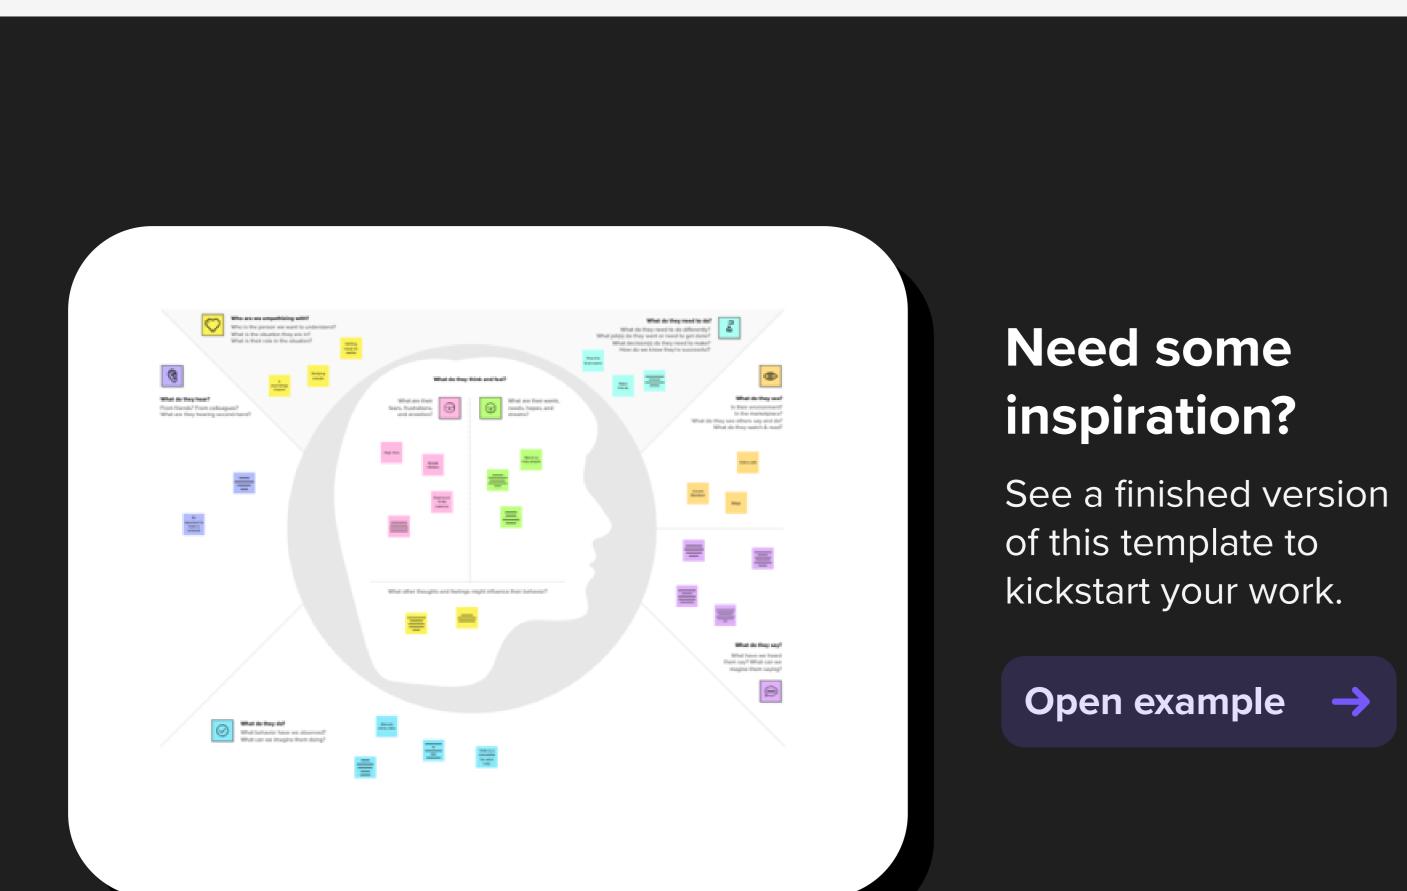

Use this framework to empathize with a customer, user, or any person who is affected by a team's work.

Document and discuss your observations and note your assumptions to gain more empathy for the people you serve.

Predicting and Monitoring Fetal Health Using Machine Learning

The goal of this project is to develop a robust model for early detection of fetal distress, preterm birth, and complications during pregnancy. Integrate real-time monitoring and interpretability features for informed decision-making. Ensure ethical data use and privacy compliance.
